ABOUT bellápierre® COSMETICS

The next generation of mineral make-up has arrived! **Bellápierre** (meaning 'beautiful stone') products give every woman exactly what she wants out her make-up, a flawless, natural look with vibrant color options!

Bellápierre is much more than just another mineral make-up brand. Every product in the range has a special twist or edge, which make it unique. Moreover, our products are composed of 100% pure minerals and pigments, which make our make-up suitable for everyone! **Bellápierre** products accommodate all skin tones and types from normal, oily, dry, and sensitive. The unrivaled variety, purity, versatility, and simplicity of **Bellápierre** products mean they are suitable for everyone and every occasion! This positions Bellápierre as an on-trend, 'catwalk style' mineral make-up brand.

Bellápierre uses 100 % PURE MICA POWDER with no other additives or ingredients whatsoever; this sets our company apart from other brands. Pure MICA is a rock, which is oxidized for color. It occurs in nature in sheets and is ground up to make various colors of shimmer and glitter.

In addition to Mica, **Bellápierre** products contain other minerals that protect and nurture the skin, such as Titanium Dioxide, a naturally occurring sunscreen. When added to makeup, it provides a natural resistance to harmful UV rays. The mineral itself reflects the sunlight so you get a natural SPF of 15 to 20.

Most mineral make-up companies only use 2-5% MICA in their products together with chemicals and fillers such as oil, wax, parabens and talc.

These are not only highly comedogenic (meaning they cause your pores to clog and eventually cause black heads, white heads, break outs, and the expansion of the pores), they are also more dangerous for your long-term health.

OUR CORE VALUES ARE:

PURITY:

Bellápierre Mineral Make-up contains 100% minerals - no talc, bismuth oxychloride or any other chemicals/harmful ingredients. Our products are recommended by dermatologists and offer complete coverage for all skin types.

VARIETY:

With over 55 shimmer powders, 10 shades of foundation, and 8 shades of blushers & bronzers, the possibilities are endless! The products can be blended to accommodate any skin tone!

SIMPLICITY:

The formulation of **Bellápierre** Mineral Make-up gives many of our products a multi-purpose usage and makes mineral make-up easier to apply than ever before.

QUALITY:

As well as using only the highest quality ingredients, **Bellápierre** offers attractive and practical packaging including powder containers, compacts, pots, jars, and bottles. All pots contain dial sifters to prevent spillage and control flow of powder; all lids contain liners, which act as a pallet to hold the powder.
